

Capt. Bruce & Shirley Shuler

I have worked with Ed Churchman over the last 20 yrs. and have always found his work to be excellent. I spent 30 years in the construction and development industry before retiring and during that time worked with numerous design and architectural companies.

Ed's work has always met design requirements and his ability to analyze construction assemblies helped to keep my projects within budget and get the look we wanted without wasting dollars on unneeded finishes.

Over the last 20 yrs. Ed has designed for me, my personal home in Friendswood, Tx. , 2400 sf., my hunting and fishing lodge (Get-A-Way Adventures Lodge) 8000 sf., and finally my retirement home about to be constructed in Bell County, Tx. He has the ability to take one's ideas and put them not only on paper, but be able to acquire the look without spending wasted dollars on finishes not required.

I would highly recommend Ed Churchman for any architectural project you may have in mind.
